

DC 3V Mini Miniature Motor for Remote Control RC Robot Toy Car

Features:

- Stable and reliable performance.
- Easy disassembly type.
- Easy to clean and maintain.
- Excellent quality and long service life.
- Has been widely applied in RC car, RC aircraft.

Specifications:

- Rated Voltage: 3V
- Speed: 17000-18000rpm per minute
- Motor Shaft Length: 9mm
- Shaft Diameter: 2mm
- Motor Size: 20 x 15 x 25mm
- Motor Weight: 14g
- Application: Used for connecting main shaft and propeller equipment, model cars, model airplanes.

Made in China
